\1 swaponline.io delivered a peer-to-peer non-custodial exchange. (Atomic Swap)

No sign-ups, deposits, wrapped tokens. Swap directly from/to MetaMask, Electrum, Coinbase, and all other in 1 minute (avg.)

Try app now: https://swaponline.io/#/exchange/eth-to-btc

👇Thread

2\ swaponline.io's main competitors are IOUs in cross-chain (Cosmos, Kava, Polkadot, Ethereum "wrapped" tokens like WBTC, renBTC, etc). They all use a kind of "multisig" like BitGo and some users don't want to use it

👇

3\ For example, $350k Monero Atomic Swaps implementation funding has done (we are not performers, this is just an example). https://ccs.getmonero.org/proposals/h4sh3d-atomic-swap-implementation.html . Monero's community doesn't want to move their funds to another "better" blockchain to use. 👏
